

# Treasure Your Teeth

Proper nutrition is crucial for optimal health. However, the condition of your teeth and gums play a vital role in your ability to grind and break down plant and animal products, which can have a dramatic impact on your overall health as well.

We are committed to the preventative maintenance and repair of your gums and teeth in a calm, gentle, caring, supportive and respectful environment.

Our comprehensive services feature cosmetic, restorative, and biologic dentistry as well as the treatment of TMJ disorders. We also offer the Invisalign approach to teeth straightening.

We are a mercury-free and mercury-safe office, meaning we use modern, amalgam-free, biocompatible materials to restore teeth to their natural appearance. We utilize protocols designed to limit exposure to the toxic vapors released when mercury fillings are removed.

You are in the hands of professionals who meet and exceed recommended guidelines for infection control and safety.

Dr. Olah has been practicing general dentistry for over twenty-five years. She fulfilled a lifelong dream in 1985, when she graduated from the University of Florida, College of Dentistry, after starting her career as a dental hygienist in 1966.

Dr. Olah spent several years in New Mexico, which influenced the design of her logo as well as the décor in her office.

## Times Are Changing

You live in a busy world and your time is valuable.

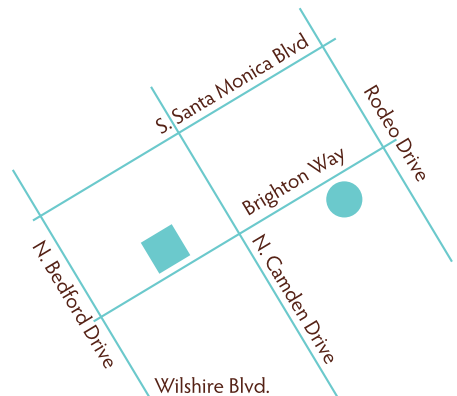

We will not keep you waiting. If it's just too hard to schedule a dental appointment during the week, relax. We proudly offer Saturday appointments for your convenience.

## Our Commitment To You

Once you establish yourself as a new patient, we offer you free whitening trays with gel to take home and whiten your teeth. We appreciate your referrals and will provide whitening supplies to you for life when a friend or relative becomes a patient.

We accept most (PPO) insurance.
